

# Rising Stars of Research 2010

NATIONAL UNDERGRADUATE RESEARCH POSTER COMPETITION

**Come to Vancouver this summer  
and present your research!**

**More than \$5000 in prizes!**

**If you have conducted a research project in your UG science,  
engineering or social sciences program, you can apply to be  
accepted for one of the 120 spots at Rising Stars of Research  
2010.**

**All selected participants will be eligible to receive up to \$500 in  
travel support. Event registration includes room and board on  
the beautiful UBC Vancouver campus.**

**When:** August 18–21, 2010

**Where:** The University of British Columbia, Vancouver, BC.

## **What is Rising Stars of Research (RSR)?**

**RSR** is a poster competition and gathering of Canada's top undergraduate researchers. It is a great opportunity to participate in Canada's only national multidisciplinary undergraduate research poster competition, and present your work to an academic audience. Network with like-minded peers and faculty researchers who share your passion for innovation and discovery.

## **Étudiants francophones**

Les étudiants francophones sont fortement encouragés de soumettre une demande pour RSR. Au cours des deux dernières années, plusieurs étudiants exceptionnels des universités francophones ont participé au concours. Plusieurs d'entre eux nous ont dit que RSR était une occasion excellente de mettre en pratique leur habileté à faire une présentation scientifique en anglais. Notez bien que le concours d'affiches et toutes les activités seront présentés en anglais. Nous espérons que vous voulez nous rejoindre!

***Application open May 10th to June 14th.  
Don't miss out!***

"My experience at RSR was just amazing. I got to meet really great people who are passionate about science just like I am. Before RSR I already knew I wanted to do graduate studies but this experience just increased my desire to do so. I think that after an experience like RSR I know that I can do anything I want in life."

— **Genvieve**, Université de Montréal
